Class Information

Class: DS-AI (141176)
Time: 12:30-14:50, Tuesday
Location: GĐ-B1

Instructor: Vũ Tuyết Trinh
School of Information Technology and Communication
Hanoi University of Science and Technology
Email: trinhvt@soict.hust.edu.vn

Descrip

This course provides students with concepts related to database, database systems and its principles; data models with a focus on relational data model, database query languages; practical skills in using relational database management systems; database design methods; database technologies such as storage organization, indexing, query optimization and data integrity.
The course also provides teamwork, problem-solving and practice skills through group discussion and presentation (during the class) and experimentation works.

Grading

- Progress (50%)
  - Practical work: 15%
  - Test: 35% (4 test)
- Final exam: 50%
